

DISTRIBUTION, SELECTIONS AND COMPARISON – 1

Directions for questions 1 to 3: These questions are based on the following information.

Among seven persons A, B, C, D, E, F and G, who are of different ages, G is younger than only D and E. F is younger to B and older than A. E is not the eldest and C is the youngest.

Who is the fourth oldest?

☒ a) B (Your answer - ✓)

☐ b) F

☐ c) C

☐ d) Data inadequate

Solution:

It is given that "G is younger than only D and E" and "E is not the eldest". From this it can be said that D, E and G are the oldest, the second oldest and the third oldest respectively. It is given that C is the youngest. Hence, from the information that F is younger to B and older than A, it can be said that B, F and A are the fourth, the fifth and the sixth oldest respectively. Thus the final order is as follows.

Oldest							Youngest
D	E	G	B	F	A	C	

B is the fourth oldest.

Choice (A)

How many persons are older than F?

☐ a) Two

☒ b) Four (Your answer - ✓)

☐ c) Five

☐ d) Data inadequate

Four out of the following five pairs of persons are similar in a particular manner and hence form a group. Find the one that does not belong to that group?

- ☐ a) EB
- ☐ b) FC
- ☐ c) DG

☒ d) FG (Your answer - ✓)

Directions for questions 4 to 7: These questions are based on the following information.

P, Q, R, S, T and U are six members of a club. Each plays a different game out of Billiards, Squash, Poker, Carroms, Golf and Badminton, not necessarily in the same order. There are two couples in the group. No lady plays Badminton and in a couple, the husband and the wife play Squash and Golf respectively. S, the husband of Q, plays Poker. T plays neither Billiards nor Squash. R plays Golf. U, a lady, plays Carroms.

Which of the following statements is/are definitely false?

- ☐ a) Q is the wife of the person who plays Poker.
- ☐ b) The person playing carroms is not one of the couples.
- ☐ c) P is the husband of the person playing Golf.

☐ d) T is the husband of Q. (Correct Answer - ✓)

Solution:

It is given that R plays Golf and a pair of husband and wife play Squash and Golf respectively. Hence, R (female) plays Golf and her husband plays Squash.

U (female) plays Carroms and S is the husband of Q and plays Poker.

T plays neither Billiards nor Squash. Hence, T plays Badminton and T is male.

⇒ P plays Squash and is the husband of R.

The following table shows the persons and the games played by them respectively.

Name of the person	Husband or Wife	Game
P (Male)	"R"	Squash
Q (Female)	"S"	Billiards
R (Female)	"P"	Golf
S (Male)	"Q"	Poker
T (Male)	–	Badminton
U (Female)	–	Carroms

By observing the above table, it can be said that choice (D) is false.

Choice (D)

Who plays Badminton?

- ☐ a) U
- ☐ b) T
- ☐ c) S
- ☐ d) Data inadequate

Who plays Billiards?

- ☐ a) P
- ☐ b) R

☐ c) Q (Correct Answer - ✓)

- ☐ d) Data inadequate

Which of the following pairs is a married couple?

☐ a) PR (Correct Answer - ✓)

☐ b) PQ

☐ c) ST

☐ d) SR

Directions for questions 8 to 11: These questions are based on the following information.

Six employees of a company – Pooja, Anupam, Anusha, Sujith, Prachi and Karthik own a different car and each has a different designation. The following information is known.

- (i) Pooja does not own Indigo.
- (ii) Karthik is Associate Engineer and owns neither Swift nor Spark.
- (iii) Anusha owns Micra and is a Business Analyst.
- (iv) Anupam, the Consultant owns Alto, while the Software Engineer owns Indigo.
- (v) Either Anupam or Prachi is Regional Manager.
- (vi) One of them owns Figo. One of them is Sales Manager.

What is the designation of Pooja?

☐ a) Sales Manager (Correct Answer - ✓)

☐ b) Software Engineer

☐ c) Regional Manager

☐ d) Cannot be determined

Solution:

Tabulating the information given in (ii), (iii), (iv) and (v).

Name	Car	Designation
Pooja	Not Indigo	
Anupama	Alto	Consultant
Anusha	Micra	Business Analyst
Sujith		
Prachi		
Karthik	Not Swift, Not Spark	Associate Engineer

From (v), Prachi is Regional Manager.

From (iv), Sujith is Software Engineer.

∴ Pooja must be Sales Manager and Karthik owns Figo.

	Designation	Car
Pooja	Sales Manager	Swift / Spark
Anupam	Consultant	Alto
Anusha	Business Analyst	Micra
Sujith	Software Engineer	Indigo
Prachi	Regional Manager	Spark / Swift
Karthik	Associate Engineer	Figo

Pooja is Sales Manager.

Choice (A)

Which car does Karthik own?

- ☐ a) Alto
- ☐ b) Indigo

☐ c) Figo (Correct Answer - ✓)

- ☐ d) Cannot be determined

Who owns Spark?

- ☐ a) Pooja
- ☐ b) Anupam
- ☐ c) Prachi

☐ d) Cannot be determined (Correct Answer - ✓)

Who is the software Engineer?

- ☐ a) Pooja
- ☐ b) Karthik

☐ c) Sujith (Correct Answer - ✓)

☐ d) Anusha

Directions for questions 12 to 15: These questions are based on the following information.

Out of 5 men – A, C, D, G and I – and 5 women – B, E, F, H and J – a group of 5 persons is to be selected which consists of exactly two men.

It is also known that,

- (i) Among A, C, D and F exactly two persons are to be selected.
- (ii) If A or D is selected, then E, F and H are not to be selected.
- (iii) If G is selected, neither H nor J will be selected.
- (iv) I and E cannot be selected together.

Among the men, who must be selected?

☐ a) C (Correct Answer - ✓)

- ☐ b) D
- ☐ c) G
- ☐ d) I

Solution:

We have to select two men and three women.

From (ii), if E, F and H are not selected, then three women cannot be selected from the remaining two women. Hence A and D are not selected. From (i), C and F are to be selected.

∴ Among the remaining men i.e., G and I, one is to be selected. From (iii), if C and G are the selected men, then B, E and F are the women that are to be selected.

Hence (C, G, B, E, F) is the only possible team.

From (iv), if C and I are the selected men, then the possible teams are (C, I, F, B, H), (C, I, F, B, J) and (C, I, F, H, J).

Among the men, C must be selected.

Choice (A)

Among the women, who must be selected?

☐ a) B

☐ b) E

☒ c) F (Correct Answer - ✓)

☐ d) H

If E is selected, who among the following must be selected?

☒ a) B (Correct Answer - ✓)

☐ b) H

☐ c) I

☐ d) J

How many groups are possible in all?

☐ a) 2

☐ b) 3

☒ c) 4 (Correct Answer - ✓)

☐ d) 5
