

DI - PIE CHART 10-9-2026

Directions for questions 1 to 5: These questions are based on the information given below.

The two pie-charts give the distribution of adults in a city.

The total number of adults is 98000 and the male to female ratio among the adults in the city is 1000 : 960.

What is the difference between the number of male and female lawyers?

☒ a) 2600 (Your answer - ✓)

☐ b) 2400

☐ c) 2480

☐ d) 2530

What is the number of males who are unemployed as a percentage of the total unemployed persons in the city?

☐ a) 40%

☐ b) 50.5%

☐ c) 56.5%

☒ d) 38.5% (Your answer - ✓)

If all the unemployed persons are given a monthly stipend of Rs.200 each, then what is the total amount distributed as stipend in one year, if the number of unemployed persons do not change throughout the year?

☒ a) Rs.15600000 (Your answer - ✓)

☐ b) Rs.156000000

☐ c) Rs.15500000

☐ d) Rs.15900000

40% of females and 20% of males who are shown as working in 'other' sectors are working in banks. The number of bank employees in the city is

☐ a) 3200

☐ b) 1500

☐ c) 4500

☒ d) 4700 (Your answer - ✓)

What is the ratio of the total number of engineers to that of teachers in the city?

☒ a) 146 : 201 (Your answer - ✗)

☐ b) 79 : 84

☐ c) 35 : 43

☐ d) 197 : 220 (Correct Answer - ✓)

Solution:

$$\begin{aligned}\text{Total number of engineers} &= \frac{54}{360} \times 48000 + \frac{25}{100} \times 50000 \\ &= 7200 + 12500 = 19700.\end{aligned}$$

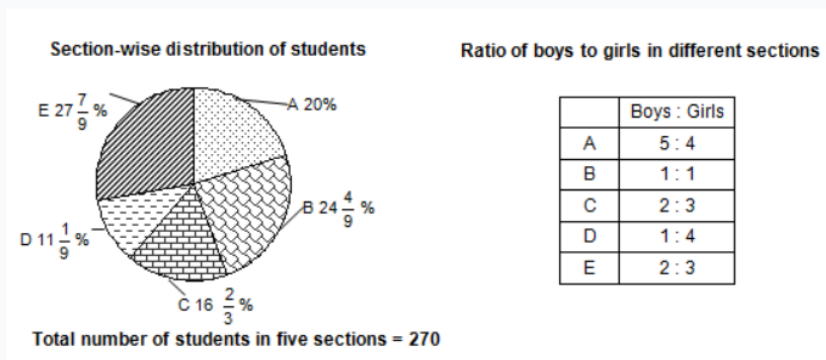

$$\text{Total number of teachers} = \frac{90}{360} \times 48000 + \frac{20}{100} \times 50000 = 12000 + 10000 = 22000$$

$$\therefore \text{Required ratio} = \frac{197}{220}.$$

Choice (D)

Directions for questions 6 to 10: Answer these questions on the basis of the information given below.

The pie chart gives the total number of students studying in the tenth standard of a school in the year 2015.

Directions for questions 6 to 8: Type in your answer in the input box provided below the question.

How many boys are studying in section A?

Your Answer: 30 ✓

Directions for questions 6 to 8: Type in your answer in the input box provided below the question.

In how many sections is the number of girls more than the number of boys?

Your Answer: 3 ✓

Directions for questions 6 to 8: Type in your answer in the input box provided below the question.

How many more students are there in section E when compared to those in section A?

Your Answer: 21 ✓

Directions for questions 9 and 10: Select the correct alternative from the given choices.
What is the ratio of the total number of boys to that of girls?

☐ a) 4 : 3

☒ b) 13 : 17 (Your answer - ✓)

☐ c) 1 : 1

☐ d) 11 : 9

Directions for questions 9 and 10: Select the correct alternative from the given choices.

If 50% of the boys in section A join section D, and the original number of boys and girls of section

D remained in section D itself, then what will be the ratio of the number of boys and girls in section D?

☐ a) 5 : 8

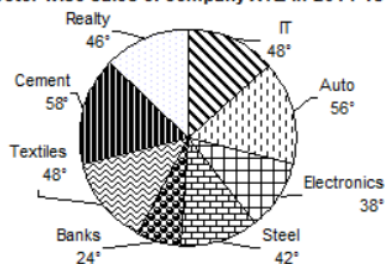

☐ b) 3 : 4

☒ c) 7 : 8 (Your answer - ✓)

☐ d) 1 : 1

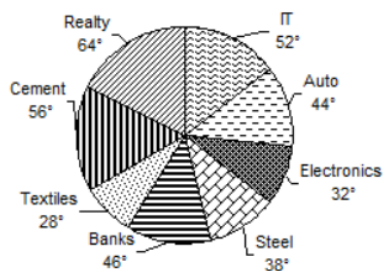

Directions for questions 11 to 15: Answer these questions on the basis of the information given below.

Sector wise sales of company XYZ in 2014-15

Total sales = Rs.259.20cr

Sector wise sales of company XYZ in 2015-16

Total sales = Rs.302.40cr

What was the percentage increase in the total sales of the company from Steel, Banks and Textile sectors together from 2014-15 to 2015-16?

- ☐ a) 10.4%
- ☐ b) 12.8%
- ☐ c) 14.6%
- ☐ d) 15.2%

Show Correct Answer

Hide Solution

PREVIOUS

NEXT

Solution:

The increase in the total sales of the company in the sectors Steel, Banks and Textiles together from 2014-15 to 2015-16

$$= \left(\frac{38 + 46 + 28}{360} \right) \times ₹302.40\text{cr} - \left(\frac{42 + 24 + 48}{360} \right) ₹259.20\text{cr} \\ = ₹94.08\text{cr} - ₹82.08\text{cr} = ₹12.00\text{cr}.$$

$$\text{The required percentage} = \frac{12.00}{82.08} \times 100 = 14.62\%.$$

Choice (C)

In 2015-16 what were the sales of the company from Electronics, Textiles and Realty sectors together?

- ☐ a) Rs.104.16 cr
- ☐ b) Rs.114.16 cr
- ☐ c) Rs.124.16 cr
- ☐ d) Rs.134.16 cr

Solution:

Sales of the company XYZ, in 2015-16, in the sectors Electronics, Textiles and Realty together

$$= \left(\frac{32 + 28 + 64}{360} \right) 302.40\text{cr} = ₹104.16 \text{ cr}.$$

Choice (A)

From which of the given sectors was the increase in the sales of the company from 2014-15 to 2015-16, the highest?

- ☐ a) Steel
- ☐ b) Cement
- ☐ c) IT
- ☐ d) Banks

Solution:

On careful observation, the increase in the sales of the company could be highest in the sectors Banks or Realty.

In Bank, the increase in the sales

$$= \left(\frac{46}{360} \right) ₹302.40 \text{ cr} - \left(\frac{24}{360} \right) ₹259.20 \text{ cr}$$

$$= ₹38.64 \text{ cr} - ₹17.28 \text{ cr} = ₹21.36 \text{ cr}$$

In Realty, the increase in the sales

$$= \left(\frac{64}{360} \right) 302.40 \text{ cr} - \left(\frac{46}{360} \right) 259.20 \text{ cr}$$

$$= ₹53.76 \text{ cr} - ₹33.12 \text{ cr} = ₹20.64 \text{ cr}$$

Clearly from the Banks, the increase in the sales was the highest.

Choice (D)

What is the ratio of the sales of the company from automobile sector in 2014-15 to the sales of the company from realty sector in 2015-16?

- ☐ a) 4 : 9
- ☐ b) 3 : 4
- ☐ c) 7 : 8
- ☐ d) 9 : 16

Solution:

$$\text{As } 25920 : 30240 \text{ is } 6 : 7, \text{ required ratio} = \frac{6 \times 56}{360} : \frac{7 \times 64}{360} \text{ i.e., } 3 : 4.$$

Choice (B)

The sales of the company from electronics sector in 2015-16 was approximately 156% of the sales of _____ sector in 2014-15.

- ☐ a) IT
- ☐ b) Steel
- ☐ c) Banking
- ☐ d) Textiles

Solution:

In 2014-15, sales of the company from the Banks sector

$$= \left(\frac{24}{360} \right) \times 6 \text{ parts i.e.,}$$

In 2015-16, sales of the company from Electronics sector

$$= \frac{32}{360} \times 7 \text{ parts}$$

∴ The required percentage of 156 is satisfied for this combination.

Choice (C)
