

Bathed in the _____ rays of the African sunset, the football stadium was serene and gave me a sense of _____.

☐ a) hypnotic . . . restoration

☐ b) golden . . . promise

☒ c) magical . . . seclusion (Your answer - ✖)

☐ d) resplendent . . . restfulness (Correct Answer - ✔)

Solution:

Choices (A) is an easy elimination because the word 'hypnotic' does not make sense in the first blank. In (B) 'golden' is apt for the first blank but 'promise' does not work for the second one. In (C) 'magical' goes for the first blank but 'seclusion' means 'isolation' and does not go with the positivity of the statement. 'Resplendent' means 'golden' and 'restfulness' goes with 'serene'.
Choice (D)

Directions for questions 1 to 3: There are two blanks in each of the following sentences. From the pairs of words given below each sentence, choose the pair that fills the blanks most appropriately.

The court need not delve into the _____ of the latest operating system, but it should set constitutional _____ for privacy in the digital age.

☐ a) technology . . . limits

☐ b) piracy . . . strictures

☐ c) faddishness . . . publicity

☒ d) minutiae . . . baselines (Your answer - ✔)

Directions for questions 1 to 3: There are two blanks in each of the following sentences. From the pairs of words given below each sentence, choose the pair that fills the blanks most appropriately.

_____ reframing can function as a useful discourse strategy to relieve tension and let the participants regain the feeling or identity that they consider _____.

☒ a) Quotidian . . . normal (Your answer - ✓)

☐ b) Neurotic . . . psychotic

☐ c) Banal . . . commonplace

☐ d) Schematic . . . rational

Directions for questions 4 and 5: In each question, there are five sentences/paragraphs. The sentence/paragraph labelled a is in its correct place. The four that follow are labelled b, c, d and e, and need to be arranged in the logical order to form a coherent paragraph/passage. From the given options, choose the most appropriate option.

- a. What would a mechanical explanation of the mind be like?
- b. That is, sciences other than physics must have their scientific credentials vindicated by physics - all sciences should be reducible to physics.
- c. One influential idea in the philosophy of the last forty years is that explaining the mind would involve showing that it is really just matter.
- d. Mental states, really, are just chemical states of the brain.
- e. This materialist (or 'physicist's) view normally depends on the assumption that to explain something fully is ultimately to explain it in terms of physical science.

☐ a) c e b d

☐ b) c d e b (Correct Answer - ✓)

☒ c) c b e d (Your answer - ✗)

☐ d) c d b e

Solution:

Statement c answers the question posed in sentence a. The next sentence, d elaborates, by saying that the matter referred to a are just chemical states. e continues by describing this as a materialist view. b concludes by saying that it almost boils down to physics. Thus, the order is cdeb. Choice (B)

- a. Think of the things computers are good at. Computers have been built that excel at fast calculation, efficient storage of information and its rapid retrieval.
- b. The sort of tasks which come quite naturally to human beings are recognising faces, perceiving linguistic structures and practical bodily skills.
- c. Artificial intelligence or AI programmes have been designed which can play excellent chess and can prove theorems in logic.
- d. These are precisely those tasks which traditional AI and cognitional science have found hardest to simulate and/or explain.
- e. But it is often remarked that, compared with computers, most human beings are not very good at calculating, playing chess, proving theorems or rapid information retrieval of the sort achieved by modern data bases.

☐ a) d c e b

☐ b) d b e c

☐ c) c b d e

☒ d) c e b d (Your answer - ✓)

Directions for question 6: The sentences given in indicated the following question, when properly sequenced, form a coherent paragraph. Each sentence is indicated with a number. Choose the most logical order of sentences that constructs a coherent paragraph and mark the correct sequence in the box provided below the question.

1. The French revolution was a major effort to effect change in each and every aspect of human life and existence in France.
2. The Kings and Queens were imprisoned, tried and executed in public.
3. The old order of monarchy and aristocracy was abolished.
4. Trials were held on thousands of aristocrats.

Your Answer: 1324 ✓

Directions for questions 7 and 8: Each of the following questions presents 5 statements of which 4, when placed in appropriate order would form a contextually complete paragraph. Pick the statement that is not part of that context and mark the number corresponding with it in the box provided below each question.

1. Although born in an orthodox Hindu family, Gandhiji read the scriptures of various other religions like Christianity, Islam, Zoroastrianism, etc. with utmost reverence.
2. Gandhiji had respect for all religions.
3. He said that since human beings were imperfect, religions, as conceived by them, could also be imperfect.
4. Tolerance is not tantamount to irreligion.
5. He believed that religions were different roads converging at the same destination.

Your Answer: 4 ✓

Directions for questions 7 and 8: Each of the following questions presents 5 statements of which 4, when placed in appropriate order would form a contextually complete paragraph. Pick the statement that is not part of that context and mark the number corresponding with it in the box provided below each question.

1. India, too, has not remained unaffected by these changes.
2. Fields like Management and Engineering have put India in an enviable position on the globe.
3. Indians have undergone a paradigm shift.
4. With the rapid liberalization and globalization and restructuring of the world in all respects (political, social or economic (the educational requirements along with informational requirements have undergone a drastic change.
5. There have been fundamental and irreversible changes in the economy, government policies, outlook of business and industry and in the mindset of the Indians in general.

Your Answer: 2 ✓

1. The Great Barrier Reef, the world's largest coral reef system, stretches more than 2,600 km off the coast of Queensland.
2. After two years of studying the way the Great Barrier Reef's corals protect themselves from ultraviolet light, scientists at the Commonwealth Scientific and Industrial Research Organisation (CSIRO) have discovered natural "filters" that block out damaging rays.
3. The filters are clear in colour, virtually odourless and very stable, which makes them easy to be incorporated into any emulsion.
4. By mimicking the filters that have enabled corals to survive for millions of years in shallow waters under the harsh Queensland sun, researchers have developed a safe and powerful sunscreen, resistant to dangerous UV radiation that causes sunburn and skin cancer, including melanoma.

Your Answer: 1 ✓

Directions for question 10: The following question has a paragraph from which the last sentence has been deleted. From the given options, choose the one that completes the paragraph in the most appropriate way.

As the largest country in South Asia, with aspirations to radically transform our economy and play a leadership role in the region and beyond, we have high stakes in peace and stability in our periphery and a special responsibility to promote it. That responsibility requires us to continue making efforts to bring some sense to even as difficult a relationship as ours with Pakistan and encourage the voice of reason in that country. Seen in this context, Prime Minister Narendra Modi's initiative to invite all South Asian Association for Regional Cooperation (SAARC) leaders, including the Pakistan Prime Minister, to his swearing in ceremony, was a wise step. _____

- ☒ a) As the largest economy in South Asia, it is our responsibility to give our neighbours a stake in our economic success to build a zone of shared prosperity in the region. (Your answer - ✓)
- ☐ b) Though we have taken significant steps in this direction under South Asian Free Trade Area (SAFTA) *vis-à-vis* other neighbours, we have not been able to do so in relation to Pakistan.
- ☐ c) Dealing with complex issues with our neighbours requires patience as well as a pragmatic and forward looking approach.
- ☐ d) More than tough language, this requires quiet and firm action on the ground to defend ourselves and deter errant behaviour.

_____. But conventional rockets entail some serious drawbacks - limited range and declining thrust performance with the rise of pressure as depth increases. The first of these problems is being addressed with a new kind of high-energy-density powerplant technology; the second may be circumvented by using a special kind of propeller screw technology.

☐ a) Most existing and anticipated autonomous vehicles rely on rocket-type motors to generate the required thrust. (Correct Answer - ✓)

☐ b) In the novel American design, powdered aluminum feeds into a whirlpool of seawater occurring in what is called a vortex combustor.

☐ c) A typical solid-rocket motor can achieve a maximum range of several tens of kilometers and a top speed of perhaps 200 meters per second.

☒ d) Researchers at Penn State's Applied Research Laboratory are operating an aluminum-burning "water ramjet" system, which was developed as an auxiliary power source for a naval surface ship (Your answer - ✗)

Gloomy foreign-policy analysts in Beijing look at Narendra Modi, India's new prime minister, and see a subcontinental version of his Japanese counterpart, Shinzo Abe. Two right-wing nationalists, elected on platforms of restoring economic growth and national pride, both need to act tough in their countries' territorial disputes with China. Mr. Abe's tenure has marked a nadir in China's relation with one big neighbour; so Mr. Modi's victory does not look good for China, either. That is one view.

☒ a) China's leaders were not invited to Mr. Modi's inauguration, but in a front seat was a formal head of the exiled Tibetan government-in-exile, who is loyal to the Dalai Lama and reviled by China as splittist. (Your answer - ✗)

☐ b) China briefly invaded the north-eastern state of Arunachal Pradesh in India in a bloody border war in 1962 and still claims sovereignty over it.

☐ c) Mr. Modi is more likely to be a right-wing leader who overcomes distrust to transform relations with China.

☐ d) But other Chinese thinkers are cheerier, applauding an apparently chummy meeting recently between Mr. Modi and China's foreign minister. (Correct Answer - ✓)

Directions for questions 13 and 14: Four alternative summaries are given below each text.

Choose the option that best captures the essence of the text and indicate the number corresponding with it in the box provided below each question.

Killing mosquitoes of the genus *Anopheles*, the sort that transmit malaria, is a serious business (so serious that some doctors would like to do it by using people as bait. Their idea is to dose those in malaria infested areas with a drug called ivermectin. This will not protect the doses directly, for it does not act on the parasite that causes the disease. But it may protect them indirectly, by making their blood poisonous to *Anopheles*. Mosquitoes do not tend to fly far from the place they hatch, and experiments suggest that if most of a village's inhabitants were to take ivermectin they could collectively do serious damage to the local *Anopheles* population. That would substantially reduce the number of cases of malaria in an area.

1. While killing *Anopheles* mosquitoes, which transmits malaria, is not easy, a few doctors have proposed a method of dosing the inhabitants of an area with a drug called ivermectin to reduce the number of malaria cases.
2. Since mosquitoes do not tend to fly far from the place they breed, doctors have put forth an idea of dosing people of malarious areas with ivermectin, which is poisonous to mosquitoes, to reduce the number of cases of malaria in the area.
3. Since killing *Anopheles* mosquitoes, which transmit malaria, is difficult, some doctors have come up with the idea of using people as a bait by dosing them with ivermectin that is poisonous to *Anopheles* mosquitoes.
4. In order to reduce the number of cases of malaria in a locality, some doctors have come up with an idea of dosing people in malaria-prone areas with a drug called ivermectin that is poisonous to *Anopheles* mosquitoes, the causative agent of the disease

Your Answer: 2 ✖

Correct Answer: 4 ✔

Solution:

The main points are:

1. Anopheles mosquitoes spread malaria.
2. Some doctors have come up with the idea of dosing people in malarious areas with a drug called ivermectin, which is poisonous to Anopheles.
3. This would reduce the number of malaria cases in an area.

The way in which ivermectin acts is not specified in option (1). The genus name Anopheles and that it is the causative agent of malaria are not mentioned in option (2). Option (3) is ambiguous.

Ans : (4)

Directions for questions 13 and 14: Four alternative summaries are given below each text.

Choose the option that best captures the essence of the text and indicate the number corresponding with it in the box provided below each question.

Drug use in adolescence is often linked to later substance-abuse in adulthood. A new study suggests that a key risk factor is a combination of a weak working memory and difficulties with impulse control. These risk factors predispose to progressive drug use in younger years and subsequent dependence, report researchers in the journal *Addiction*. The study focused on alcohol, marijuana and tobacco use, the most commonly used drugs by adolescents. For young people with difficulties in impulse control, intervention programmes that focus on simply stopping early drug use don't go far enough. Youth with a weak working memory tend to have problems controlling their impulses and thus appear to be at greater risk of continuing drug use.

1. A new study, published in the journal Addiction states that a key risk factor in drug use during adolescence is a combination of a weak working memory, i.e., the inability to concentrate on a task without being easily distracted, and difficulties with impulse control.
2. A new study suggests that a key risk factor in drug use during adolescence is a combination of a weak working memory and difficulties with impulse control, which predisposes to progressive drug use in younger years and subsequent dependence.
3. A recent study that focused on alcohol, marijuana and tobacco use by adolescents found that intervention programmes don't go far enough, and the use is often linked to later substance-abuse in adulthood.
4. While a recent study shows that drug use in adolescence can lead to a combination of a weak working memory and difficulties with impulse control, intervention programmes for such young people to just stop early drug use continue even in adulthood.

Your Answer: 2 ✖

Correct Answer: 4 ✔

Solution:

The main points are:

1. Studies show that drug use in adolescence can lead to a weak working memory and difficulties with impulse control.
2. Intervention programmes for simply stopping early drug use don't succeed.
3. The dependence continues in adulthood.

Though option (1) explains what a weak working memory is, it does not cover points 2 and 3. Option (2) makes no reference to the intervention programmes. Point 1 has not been mentioned in option (3). Option (4) covers all the points.

Ans : (4)

Directions for question 15: In the following question, the word at the top is used in four different ways, A to D. Choose the option in which the usage of the word is INCORRECT or INAPPROPRIATE.

STAND

- ☐ a) He told me that he could not **stand** people who were dishonest.
- ☐ b) I asked her what her **stand** was with regard to the death penalty.
- ☒ c) I helped her **stand** to her feet. (Your answer - ✓)
- ☐ d) The students **stood** when the teacher entered the room.

Solution:

The usage of the word stand, is incorrect in sentence C. 'stand' is used nearly always after sitting whereas 'get to' is used when one stands up after sitting kneeling or lying. Thus 'stand' should be replaced with 'get to' Choices (C)
