

Directions for questions 1 to 3: These questions are based on the following information.

Seven persons A, B, C, D, P, R and S live in a seven floor apartment (ground floor is 1st floor and 1st floor is 2nd floor and so on). Each floor is painted with a different colour. One of the floors is painted with Pink.

B does not live on an odd numbered floor. P does not live on the fifth floor, which is painted Purple. B's floor is exactly between the floors where R and S live and is painted Red. S lives neither on an odd numbered floor nor on the second floor.

C's floor is above the floor on which P lives and is painted Blue. Third floor is painted Yellow. R does not live on the floor which is painted White. D lives on the floor which is painted Green.

In which floor does A live and what is the colour of the floor on which A lives?

- ☐ a) 5th – Yellow
- ☐ b) 6th – Purple
- ☐ c) 2nd – Pink
- ☐ d) 5th – Purple

Who lives on the floor which is painted Pink?

- ☐ a) A
- ☐ b) B
- ☐ c) R
- ☐ d) P

Which of the following statement is correct based on the given information?

- ☐ a) S lives on the floor which is painted Pink.
- ☐ b) C lives on the fifth floor.
- ☐ c) A lives on the floor which is painted Purple.
- ☐ d) R does not live on the second floor.

Directions for questions 4 to 7: These questions are based on the following information.

Eight persons – A to H – sit around a circular table facing center such that the distance between any two adjacent persons is same. And each of them belongs to a different city among – Delhi, Mumbai, Bengaluru, Chennai, Pune, Hyderabad, Vijayawada and Visakhapatnam but not necessarily in that order. The following information is known about their seating arrangement.

The person from Pune sits third to the left of the person who sits opposite the person from Hyderabad. Neither B nor G is from either Pune or Hyderabad. E is from either Mumbai or Vijayawada and sits adjacent to neither A nor F. A is from either Chennai or Bengaluru and sits opposite F, who is from neither Pune nor Hyderabad. Only two persons sit between G and the person from Delhi. D is from either Mumbai or Delhi. Either C or H sits opposite the person from Vijayawada. The person from Mumbai sits to the immediate left of H but he is not a neighbour of A. The persons from Bengaluru and Visakhapatnam sit adjacent to each other.

H is from which among the following cities?

- ☐ a) Pune
- ☐ b) Hyderabad
- ☐ c) Visakhapatnam
- ☐ d) Chennai

Who among the following persons is from Visakhapatnam?

- ☐ a) B
- ☐ b) C
- ☐ c) H
- ☐ d) G

What is the position of A with respect to B?

- ☐ a) Second to the left
- ☐ b) Third to the left
- ☐ c) Third to the right
- ☐ d) Second to the right

Four of the following five are alike in a certain way hence form a group. Find the one which does not belong to that group.

- ☐ a) B – Hyderabad
- ☐ b) D – Visakhapatnam
- ☐ c) A – Delhi
- ☐ d) G – Mumbai

Directions for questions 8 to 11: These questions are based on the following information.

Five archeologists – P, Q, R, S and T were looking to gather artifacts of a surveyed site. Each one of them was assigned to a different site that is numbered as: A413, B201, C302, D109 and F507. Each archeologist found a different number of coins at his/her respective site. All coins excavated by each archeologist are of the same denomination. The coins from different sites had different denominations, which is one among 1, 2, 3, 4 and 5.

1. The highest number of coins were excavated at site B201.
2. P, whose excavation resulted in the least number of coins, had the highest value in denomination.
3. The total number of coins excavated at the five sites together is 75, and the total value (i.e. value = # of coins x denomination) of coins at all sites together is 183.
4. The number of coins excavated by each archeologist is an odd multiple of 3.
5. Q who was assigned site D109, excavated coins that had the highest value.
6. The number of coins discovered at site A413 is 15 this site was assigned to R. S was assigned site C302.
7. The denomination of coins excavated by R is greater than those excavated by S.

Directions for questions 8 to 11: Type in your answer in the input box provided below the question.

How many coins were excavated at site A413?

Directions for questions 8 to 11: Type in your answer in the input box provided below the question.

What is the highest value of coins excavated from among the five sites?

Directions for questions 8 to 11: Type in your answer in the input box provided below the question.

What is the denomination of coins excavated at site C302?

Directions for questions 8 to 11: Type in your answer in the input box provided below the question.

What is the number of coins excavated whose denomination is 4?

Directions for questions 12 to 15: These questions are based on the following information.

A team is to be selected from among 10 students A through J. The selection is to take place according to the following conditions:

- (1) If A is selected, either D or F but not both should be selected
- (2) G must be selected. At least one between E and F must be selected.
- (3) Only one of I and J has to be selected.
- (4) B and H are not together.

Size of the team is the number of students selected.

In each of pairs (E, H) and (F, C), if one student is selected, then the other student must be selected.

What is the maximum possible size of the team?

- ☐ a) 6
- ☐ b) 7
- ☐ c) 8
- ☐ d) 9

In how many different ways can the team be selected following the above condition if A is definitely selected?

- ☐ a) 6
- ☐ b) 8
- ☐ c) 10
- ☐ d) 12

If both D and F are selected, what is the number of ways of selecting the team?

- ☐ a) 4
- ☐ b) 5
- ☐ c) 6
- ☐ d) 8

In the previous question what is the minimum and maximum size of the team formed?

- ☐ a) 6, 7
- ☐ b) 4, 7
- ☐ c) 5, 7
- ☐ d) None of these
