

DEDUCTIONS AND CONNECTIVES_28-9-2026

Directions for questions 1 to 4: Each of these questions consists of six statements followed by four sets of three statements each. Select as your answer the set in which the third statement logically follows the first two statements.

- A. No mute is deaf.
- B. A few deaf persons are not dull.
- C. All dull persons are mute.
- D. A few dull persons are mute.
- E. No deaf person is mute.
- F. No deaf person is dull.

- ☐ a) FAD
- ☐ b) DAB
- ☐ c) CAF
- ☐ d) FCE

Solution:

- (A) As both the premises are negative, there can be no conclusion.
 - (B) As the term 'dull' is not distributed in the premises, it cannot be distributed in the conclusion.
 - (C) It is a valid conclusion as none of the rules is violated.
 - (D) As the term 'mute' is not distributed in the premises, it cannot be distributed in the conclusion.
- Choice (C)

Directions for questions 1 to 4: Each of these questions consists of six statements followed by four sets of three statements each. Select as your answer the set in which the third statement logically follows the first two statements.

- A. No artificer is a craftsman.
- B. All artificers are artisans.
- C. Some artisans are not craftsman.
- D. Some artisans are sculptors.
- E. Some sculptors are not craftsman.
- F. Some artificers are sculptors.

- ☐ a) ABC
- ☐ b) CDE
- ☐ c) DBF
- ☐ d) CED

Solution:

- (A) It is a valid conclusion as none of the rules is violated.
- (B) As both the premises are particular, there can be no conclusion.
- (C) As the middle term 'artisans' is not distributed, there can be no conclusion.
- (D) As both the premises are particular, there can be no conclusion.

Choice (A)

Directions for questions 1 to 4: Each of these questions consists of six statements followed by four sets of three statements each. Select as your answer the set in which the third statement logically follows the first two statements.

- A. Some rifles are not pistols.
- B. All cannons are guns.
- C. No gun is a pistol.
- D. A few cannons are rifles.
- E. A few guns are rifles.
- F. Some guns are not rifles.

- ☐ a) BDF
- ☐ b) ECA
- ☐ c) ACE
- ☐ d) CFA

Solution:

(A) As both the premises are affirmative, the conclusion cannot be negative.
(B) It is a valid conclusion as none of the rules is violated.
In choices (C) and (D) as both the premises are negative, there can be no conclusion.
Choice (B)

Directions for questions 1 to 4: Each of these questions consists of six statements followed by four sets of three statements each. Select as your answer the set in which the third statement logically follows the first two statements.

- A. A few damages are detriments.
- B. All abuses are damages.
- C. All detriments are abuses.
- D. All abuses are detriments.
- E. A few abuses are not damages
- F. All damages are detriments.

- ☐ a) BDA
- ☐ b) BDF
- ☐ c) FBC
- ☐ d) FCE

Solution:

(A) It is a valid conclusion as none of the rules is violated.
(B) As the term 'damage' is not distributed in the premises, it cannot be distributed in the conclusion.
(C) As the term 'detriments' is not distributed in the premises, it cannot be distributed in the conclusion.
(D) As both the premises are affirmative, the conclusion cannot be negative.
Choice (A)

Directions for questions 5 to 8: The questions given below have four options of three statements each. Read the statements in each option carefully and identify the option where the third statement logically follows the first two statements in the option.

- ☐ a) All rewards are not awards. Some incentives are not awards. Many rewards are incentives.
- ☐ b) Some incidents are adventures. Some events are not incidents. Some events are adventures.
- ☐ c) All episodes are chapters. All episodes are encounters. All chapters are encounters.
- ☐ d) Knowledge is an observation. Most occurrences are knowledge. A few observations are occurrences.

Solution:

From the choices,

(A) As both the premises are negative, there is no conclusion.

(B) As both the premises are particular, there is no conclusion.

(C) As the term 'chapter' is not distributed, in the premise, it cannot be distributed in the conclusion.

(D) Middle term 'knowledge' is distributed. As neither of the other two terms is distributed, the conclusion must be particular, which can be "few observations are occurrences".
Choice (D)

Directions for questions 5 to 8: The questions given below have four options of three statements each. Read the statements in each option carefully and identify the option where the third statement logically follows the first two statements in the option.

- ☐ a) No treacherous is a loyalty. A few loyalty is fidelity. Many fidelities are not treacherous.
- ☐ b) All beliefs are faiths. Honesty is faith. A few beliefs are honesty.
- ☐ c) All beauty is fair. No beauty is ugly. Some ugly are not fair.
- ☐ d) Many trusts are not truths. Some truths are not words. Some words are not trusts.

Solution:

From the choices,

(A) "The middle term 'loyalty' is distributed.

As one of the premises is negative and the other is particular, the conclusion must be particular negative.

As the term treacherous is distributed and the term fidelity is not distributed, the conclusion must be many fidelity are not treacherous.

(B) As the middle term 'faith' is not distributed, there is no conclusion.

(C) As the term middle 'fair' is not distributed in the premise, it cannot be distributed in the conclusion.

(D) As both the premises are particular, there is no conclusion.

Choice (A)

Directions for questions 5 to 8: The questions given below have four options of three statements each. Read the statements in each option carefully and identify the option where the third statement logically follows the first two statements in the option.

- ☐ a) All myth are novels. A few novels are not thesis. Some thesis are not myths.
- ☐ b) Some horrors are scares. A few horrors are not fears. Many scares are not fears.
- ☐ c) All corns are crops. All granes are crops. All corns are granes.
- ☐ d) All carnivals are celebrations. No carnival is a pageant. Some celebrations are not pageants.

Solution:

From the choices,

(A) As the middle term 'novel' is not distributed, there is no conclusion.

(B) As both the premises are particular, there is no conclusion.

(C) As the middle term 'crops' is not distributed, there is no conclusion.

(D) The middle terms 'carnivals' is distributed. As one of the premises is negative, the conclusion must be negative. As one of the remaining terms (celebrations) is not distributed and the other term (pageant) is distributed the conclusion must be particular negative, which is, "few celebrations are not pageants".

Choice (D)

Directions for questions 5 to 8: The questions given below have four options of three statements each. Read the statements in each option carefully and identify the option where the third statement logically follows the first two statements in the option.

- ☐ a) All blasts are bursts. Some cyclones are not bursts. Some blasts are not cyclones.
- ☐ b) Few abilities are capacities. Many capacities are propensities. Some abilities are propensities.
- ☐ c) All cairns are cists. Some crypts are cairns. Some crypts are cists.
- ☐ d) Some pits are tombs. Some vaults are not tombs. Some pits are not vaults.

Solution:

From the choices,

(A) As the term 'cyclones' is not distributed in the premise, it cannot be distributed in the conclusion.

(B) As both the premises are particular, there is no conclusion.

(C) The middle term 'cairn' is distributed. As both the premises are affirmative, the conclusion must be affirmative. As one of the premises is particular, the conclusion must be particular. The conclusion can be many crypts are cists.

(D) As both the premises are particular, there is no conclusion.

Choice (C)

Directions for questions 9 to 12: In each question, there is a main statement followed by four statements A, B, C and D. From the choices, choose the ordered pair where the first statement implies the second statement and the two are logically consistent with the main statement.

Swati would be selected in the first company, if she has an excellent academic record.

- A. Swati is selected in the first company.
- B. Swati is not selected in the first company.
- C. Swati has an excellent academic record.
- D. Swati does not have an excellent academic record.

- ☐ a) AC
- ☐ b) BD
- ☐ c) DB
- ☐ d) AD

Solution:

q

Swati would be selected in the first company,

p

if

she has an excellent academic record.

The implications of the statement are
(i) $p \Rightarrow q$ and (ii) $\sim q \Rightarrow \sim p$
 $\therefore$ It can be CA or BD.

Choice (B)

Directions for questions 9 to 12: In each question, there is a main statement followed by four statements A, B, C and D. From the choices, choose the ordered pair where the first statement implies the second statement and the two are logically consistent with the main statement.

Only if Abhijeet has good knowledge in classical music, he would be elected as Musical Idol.

- A. Abhijeet does not have good knowledge in classical music.
- B. Abhijeet is elected as Musical Idol.
- C. Abhijeet is not elected as Musical Idol.
- D. Abhijeet has good knowledge in classical music.

- ☐ a) CA
- ☐ b) DB
- ☐ c) BD
- ☐ d) BA

Solution:

p

Only if Abhijeet has good knowledge in classical music,

q

he would be elected as Musical Idol.

The implications of the above statement are

(i) $q \Rightarrow p$ and (ii) $\sim p \Rightarrow \sim q$

It can be BD or AC.

Choice (C)

Directions for questions 9 to 12: In each question, there is a main statement followed by four statements A, B, C and D. From the choices, choose the ordered pair where the first statement implies the second statement and the two are logically consistent with the main statement.

Unless the Indian government seals the borders illegal migration in India will not stop.

- A. Indian government sealed the border.
- B. Illegal migration in India stopped.
- C. Indian government had not sealed the borders.
- D. Illegal migration in India will not stop.

- ☐ a) CD
- ☐ b) AB
- ☐ c) CB
- ☐ d) AD

Solution:

Unless p

The Indian government seals the borders,

q

illegal migration will not stop.

The implications of the above statement will
(i) $\sim p \Rightarrow q$ and (2) $\sim q \Rightarrow p$.
It can be CD or BA. Choice (A)

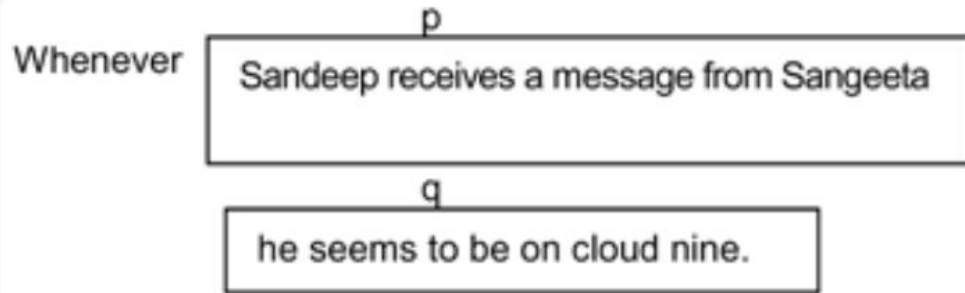

Directions for questions 9 to 12: In each question, there is a main statement followed by four statements A, B, C and D. From the choices, choose the ordered pair where the first statement implies the second statement and the two are logically consistent with the main statement.

Whenever Sandeep receives a message from Sangeeta, he seems to be on cloud nine.

- A. Sandeep did not receive a message from Sangeeta.
- B. Sandeep is on cloud nine.
- C. Sandeep is not on cloud nine.
- D. Sandeep received a message from Sangeeta.

- ☐ a) BA
- ☐ b) BD
- ☐ c) CD
- ☐ d) CA

Solution:

The implications of the above statement are

(1) $p \Rightarrow q$ and (2) $\sim q \Rightarrow \sim p$

It can be DB or CA.

Choice (D)

Directions for questions 13 to 15: Each question given below is a statement followed by four different statements. Choose the one which is the correct negation of the given statement.

The presentation was lengthy but simple.

- ☐ a) The presentation was not lengthy and not simple.
- ☐ b) The presentation was lengthy but not simple.
- ☐ c) The presentation was not lengthy or not simple.
- ☐ d) The presentation was simple but not lengthy.

Solution:

The statement is of the form,
 p and q

The negation is $\sim p$ or $\sim q$.

Choice (C)

Directions for questions 13 to 15: Each question given below is a statement followed by four different statements. Choose the one which is the correct negation of the given statement.

Unless Tarun learns the basics, he cannot solve connectives.

- ☐ a) Tarun learned the basics but he could not solve connectives.
- ☐ b) Tarun did not learn the basics, but he could solve connectives.
- ☐ c) Tarun learned basics and solved connectives.
- ☐ d) Tarun did not learn basics and he did not solve connectives.

NEXT

Solution:

The statement is of the form,
Unless p , q .
The negation is $\sim p$ and $\sim q$.

Choice (B)

Directions for questions 13 to 15: Each question given below is a statement followed by four different statements. Choose the one which is the correct negation of the given statement.

He either goes to US or he will join a job.

- ☐ a) He went to US and did not join a job.
- ☐ b) He went to US but joined a job.
- ☐ c) He did not go to US and joined a job.
- ☐ d) He did not go to US and did not join a job.
